Financial Statements for the year ended December 31, 2006

Message from Chairman

Thailand's economic growth rate in 2006 is higher than 2005 which rated 5.0% and 4.5% respectively. Negative factors caused to effect the economic growth in 2006, such as, high interest rate in the first half year of 2006 and maintain to end of the year, flood disaster, fluctuation of oil price in high level, the uncertainty of political situation and the government financial policy, all that factors are impact to the confidence of private sector investment and consumer's consumption especially in construction industry and immovable property which are effected to lower demand of housing in fourth quarter of 2006.

In 2006, Rich Asia Steel Public Company Limited has total revenue 4,345.46 million baht decreased by 574.53 million baht or 11.67% from the same period of 2005. The decreased revenue is effected by the decreasing of steel price in world market from the end of 2005 thru the mid of 2006, also domestic average steel price has been decreased by 10-12 % from 2005. Whereas the sales volume in 2006 has been increased by 2%, as well as the efficiency inventory control by management, are result to the reduction of Cost of Goods Sold for amount of 662.19 million baht, so the company has achieved net profit in 2006 amount of 81.62 million baht which greater than in 2005 for 65.75 million baht or 414.37%.

The company has targeted to be One-Stop Service Center of steel by providing, producing and sell all kinds of steel products that to serve various customer demands in each industry segments. Furthermore, we are focus to develop and produce high quality products and the business expansion incessantly.

On behalf of the Board of Directors, we would like to express our appreciation for shareholders and valued customers for your trust and support our company, also company's staff who work actively for company developing to present. We will process the business to strong growth and incessantly with a good corporate governance to ensure that we maintain the best benefit for company and all shareholders.

Gen. Naruedol Dejpradiyuth

Chairman

Message from Chief Executive Officer

The year 2006 marked significant step for Rich Asia Steel Public Company Limited. The Company have been approved to be listed security in Stock Exchange of Thailand (SET) on August 31, 2006 and lead the company to be known and widely accepted. With high performance and vision of Board of Directors, as well as management's co-operation, result to the company's growth and increased sales volume (in quantity) comparing to year 2005, even though in 2006 there were several factors that interrupted economic growth such as domestic political changing and regulation to reserve capital inflow for investment.

The company's operation in 2006, has earned net profit of 81.62 million baht which is effected by the efficiency inventory control especially raw material and finished goods including additional selling the products with higher gross margin.

In 2007, The company still process the project of structural steel for automobile industry and others. We plan to set up local Distribution Centers (D/C) in feasible area. These D/C will be company's channel, act as stockist, to support our customers' demand and also be customer care center.

On behalf of Board of Executive Committee, we would like to express my gratitude to all shareholders and partners who trusted, confident and support extended to the company. We will professionally maintain our operating standards to support customers' demand and worthy returns to the shareholders.

Chairman of Audit Committee

General Information

Rich Asia Steel Public Company Limited was established by Thai and Hong Kong investors on May 10, 1999 as Rich Asia Trading (Thailand) Co., Ltd., with an initial registered capital of Baht 1.00 million. The Company aimed to provide and distribute steel products by trading and contracting other manufacturers to produce steel products for the Company. In 2003, the Company has expanded its business to be a manufacturer of structural steel products. Currently, the total production capacity is 125,000 tonnes per year with the actual utilization rate of 24.03% of total production capacity in 2006.

The Company's background and major development can be summarized as follows:

- | | |
|---------------|--|
| 1999 May | Established the company named "Rich Asia Trading (Thailand) Co., Ltd." with initial registered capital of Baht 1.00 million to operate as a trading company to provide steel products such as hot rolled coil and sheets, structural steels, lip channel steels, billets and other steel products. |
| 2000 January | Employed Siam Ferro Industry Co., Ltd. to provide steel production services. |
| February | Employed Inter Metal Tube Alliance Co., Ltd. to provide steel processing services. |
| 2001 January | Increased its registered capital to Baht 5.00 million to be used as working capital. |
| 2002 June | Increased its registered capital to Baht 75.00 million to be used as working capital. |
| 2003 June | Set up plant and warehouse to expanded its business to become a manufacture of steel pipes. |
| November | Launch its processing steel products for sale in domestic. |
| December | Increased its registered capital to Baht 250.00 million to purchase a steel pipe machine. |
| 2004 December | Increased its registered capital to Baht 400.00 million to be used as working capital. |
| 2005 August | Purchase C-Channel machine. |
| 2006 March | Changed the name from "Rich Asia Trading (Thailand) Co., Ltd." to "Rich Asia Steel Plc."

Increased registered capital from Baht 400 million to Baht 500 million and changed par value from Baht 100.00 to Baht 1.00 each which resulted in an increase in the number of ordinary shares from 400,000,000 shares to 500,000,000 shares and converted the company to be public company with the intention to be listed on the Stock Exchange of Thailand. |
| August | Listing date as at 31 August 2006 (Trading commencement on 31 August 2006 by Initial Public Offering totaling 100 million shares) |
| November | - Operated local the third Distribution Center (D/C) at Tambol Pantainorasingh, Amphor Muang Samut Sakhon, Samut Sakhon Province

- Began to construct the fourth local Distribution Center (D/C) at Tambol Lamsai, Amphor Wangnoi, Ayutthaya Province |

Nature of Business

Rich Asia Steel Public Company Limited is a trader and supplier of other types of steel products including raw materials and finished products. The finished products are composed of, for example, structural steel pipe, hot rolled coil and sheets, billet, and others. With company's policy of being a manufacturer, trader, and supplier of all types and sizes of steel products; hence, the company can be deemed as a "One-Stop-Service Company" by the coordinate of purchasing planning, production planning and hiring other steel plants to produce, and the efficiency of inventory control managing that to provide the product for serve the customer demand by rapidly as quality and quantity.

The company's products and services can be classified into 2 categories as follows:

1. Trading and distribution of various steel products

The Company acquires steel products from trading as well as hiring other steel plants to produce the products for the Company including raw material and finished products as follows

1.1 Structural steel pipes which are steel pipes and lip channel steel

The Company contracts manufacturers to produce square tube, black steel pipe and rectangular tube with standard length 6 meters, diameter ½" – 8" and thickness 1.00-4.50 millimeters. In addition, the Company provides trading of steel products to serve customers' need for general usage such as construction and water pipe.

1.2 Hot rolled steel coil and sheets

The Company sources hot rolled steel coil and sheets from distributors and resells them to customers who are wholesalers and manufacturers in various industries such as construction, automobile furniture etc. The product has thickness 1.20-12.00 millimeters with varying sizes according to customers' specifications mainly used for construction.

1.3 Billet and other products

As a One-Stop-Service Policy, the Company engages in the trading of billet and other products such as checkered Plate, slit sheet, angle, steel channel, fitting, Channel H beam, I beam, and wide flange, etc. to complete a range of products as required by customers.

2. Manufacturing structural steel

Besides trading and distribution of various steel products, the Company has established production lines for structural steel as follows:

2.1 Steel pipes

The Company is a manufacturer of steel pipes consisting of square tube, black steel pipe and rectangular tube with standard length 6 meters, diameter ½ " – 3" and thickness 1.00-4.50 millimeters.

Currently, the Company has 2 machines with total capacity of 75,000 tonnes per year. The actual utilization rate is 27.62 in 2006.

2.2 Lip channel steels

The Company produces 5"- 8" lip channel steels with thickness 1.60-3.20 millimeters and also produces 8" chassis used as a component of a truck. Currently, the Company has 1 machine with total capacity of 50,000 tonnes per year. The actual utilization rate of 2006 is 18.65%.

For products which the Company cannot produce or does not worth changing its production line to produce, the Company will contract other manufacturers to produce for the Company.

Goals and Objectives of the Company

RICH is one of the leaders in trading and supplying steel product. The Company has a policy of being a solid provider and manufacturer of steel products including raw materials and finished products. The Company's objective is to operate as a complete and full range trader and supplier providing its customers various type and size of steel products as "One-Stop-Service". The Company also provides fast and on-time delivery service with the purpose of responding to customer needs promptly.

In addition, the Company aim to be a leader in manufacturing steel product and vary its product to expand its client base to the processed steel group, mainly focus on the automobile industry.

Customer Characteristic and target customer group

The major's target customer is enterprise in construction industries and new target customer is enterprise in automotive industries as well as related industries which use the company's products as raw material.

Sales and Distribution Channels

The company sell products to an approximately 300 wholesales located throughout Bangkok, boundary and provinces, which sell products to user. Moreover, the company directly sells to enterprise which use the Company's products as raw material. The portion sell to wholesale and enterprise is 95 percent and 5 percent, respectively. Currently, the Company has 4 distribution centers, 1 distribution center located in Samut Prakarn province, 2 distribution centers located in Samut Sakhon province and 1 distribution centers located in Ayutthaya province (under construction)

Competition

Currently, the company's steel pipes product is target to low-end market (Mass Market) which is widely use and continuing demand from customer, such as construction in housing and building. Also, there are four competitors which target the same group of customers. However, The competition is not

severe even there are many enterprise in the steel pipe industries because of target in difference customers group, Also, the trend of steel consumption is continue to increase as result of expansion of property and construction industries, usage in related industries and usage steel to replace construction materials.

Products procurement

The Company' raw materials and main product is hot rolled coil and sheet, steel pipe, cold formed C Channel, and other types of steel products (billet, rectangular steel, square steel, a water main tube, a slit, a joint, etc.) The company procures various steel product through trading, hiring and producing for selling to the customer which are 26.61%, 60.77% and 12.62% in 2006, respectively.

Raw material purchasing policy

The Company will order hot rolled coil 1 month in advance with approximately 10,000 tonnes per order consistency to have enough raw material with quality as required by customer.

Production policy

The Company has a policy to utilize its existing machine to focus on steel products with special specifications (made to order) and to produce standard steel products if there is no order for special specification products. The Company will mainly subcontract other manufacturers to produce standard steel. The Company will subcontract other manufacturers to produce steel products which the Company's plant cannot produce or is not worth changing its production line to produce.

Environmental Impacts

Major environmental impacts of RICH's operation are noise from operation and scrap which will be collected and sold. For Noise, the Company 's operation conforms to the regulations of the Department of Labour Protection & Welfare. Since operating the factory , the company has never been filed by any lawsuit relating to environmental impacts or any warning or fine from government agencies following the regulated acts, including Factory Act AD 2535 and Environmental Act AD. 2535. Moreover, the factory has been continues to renew license and permits by regulator every years.

Future Project

The Company plans to produce industrial steel such components of automobile assembly and packaging for import. The Company began its industrial steel processing and distributed to customers in automotive industry since the first quarter of 2006 which will be recognized as revenue in the second quarter of 2006 in an amount of Baht 3.00 million. The production will be made to order.

At present, the Company applies its current machines to produce industrial steel. However, the Company plans to purchase new machines for industrial steel processing in the second quarter of 2007 and

expects to commence production in the fourth quarter of 2007. The total investment is approximately Baht 80 million.

The company has business plan to establish Distribution Center (D/C) in major province with the objectives of stockist for prospect customers and enlarge numbers. One D/C, which fully establishment located at Pantainorasingh, Mueng Samut Sakhon, Samut Sakhon province, will serve customers in eastern and partial of lower Bangkok. Another D/C, which under construction located at Wangnoi area, Ayutthaya province will serve customers in lower middle part and Eastern (Partial) of Thailand. The company is studying feasibility location of each appropriate province for the following D/C.

Risk factors

1. Risk from fluctuation of raw material price

The company's major raw material is Hot Rolled Coil (HRC) which accounted for 89.50% of total value of raw material purchased in 2006 and all of HRC purchase are from domestic suppliers. HRC price will be changed according world price and domestic demand and supply which might effect to raw materials cost and gross margin.

In order to control risk from fluctuation of HRC, the managements closely monitors steel price and evaluates trend of world price and domestic price of HRC, market situation as well as cost of goods sold and set its selling price which its level could reduce the risk from fluctuation of raw material price.

2. Risk from products procurement

The company mainly purchase Hot Rolled Coil from a domestic supplier, Great Eastern Internation Co.,Ltd. one of distributor of G steel PLC, accounting for 74.76% of total value of raw material purchase in 2006. Hence, the company may face the risk from relying on this supplier to supply adequate raw materials for production, and the risk from only 2 HRC manufacturers, Sahaviriya Steel Industry Public Company Limited, G Steel Public Company Limited which merged with Nakornthai Strip Mill Public Company Limited in 2006.

However, the company has never experienced any shortage of raw material with this supplier due to a consistency placing order and the company is able to reduce the risk by importing raw material from foreign countries.

3. Risk from exchange rate fluctuation

In 2006, the company import billets from Russia and India accounting for 5.6% of total raw materials purchased, the company may face the risk associated from speculation of exchange rate and fluctuation by government policy. The company mitigates its risks by entering into forward contracts, therefore, the company can totally hedge it exchange rate risk.

4. Risk from competitive law change

Anti - Dumping : AD

Department of Foreign Trade, Ministry of Commerce announcement to claim surcharge on-importing Hot Rolled Coil from Japan, The republic of South Africa, Russia, Kazakhstan, India, Korea, Taiwan, Venezuela, Argentina, Ukraine, Algeria, Indonesia, Slovak Republic and Romania. This surcharge effect to HRC price from foreign countries higher than domestic. If such Anti-Dumping surcharge end in 2008, HRC import price may be lower than domestic's, and caused to serve competition of pipe's price.

Thus, the company may increase HRC from other sources which is lower price to maintain its competitiveness

The Free Trade Agreements (FTAs)

The acceptance of Free Trade Agreement (FTAs) with the Republic of China, Australia, New Zealand and The Republic of India which is bilateral and multilateral. The FTAs encourage trading and investments and HRC and Steel Pipe Tariff rate with the Republic of China will be 0-5% within 2018. The company may unavoidable high level of competition from foreign competitors. However, imported productions factors i.e. lead time and delivery cost may not cause any difference of imported and domestic's one, and imported production also to apply TISI standard which is not enhanced to import.

The protection risk of FTAs, the company may procure lower price raw material from foreign countries to maintain its competitiveness.

Operational results

Rich Asia Steel Public Company Limited business is being a seller and supplier of steel products which acquired from trading as well as hiring other steel plants to produce the products for the company, the company is also a trader and supplier of other types of steel products including raw materials and finished products. The finished products are composed of, for example, structural steel pipe, lipped channel, hot rolled coil and sheets, billets, and others.

In 2006, the company constructed 2 distribution centers in addition, 1 distribution center located in Samut Sakhon province (Phan Tai Norasing) constructed in November 2006 and another located in Ayutthaya province (Wang-Noi) is under construction which will be finished in the second quarter of 2007. The company purchase 1 new machine in December 2006 which fully installed and began operation in January 2007.

The company has launched new product of Angle bar record sales of Baht 11.12 million or approximately 0.26 % of total revenue.

Sales

Sales for the year ended December 31, 2006 amounted to Baht 4,332.51 million compared to last year's Baht 4,904.96 million. The products sale volume decrease are Square tube, Black steel pipe and Rectangular tube. The revenue from products sale increase compose of Lipped channel and Angle bar.

According to the decreasing of the world steel prices in 2005 thru 2006, the domestic selling prices have been also decreased by 10%-12%. Whereas, the sales volume has been increased by 2%. Due to the decreasing of selling prices, the total revenue in 2006 have been decreased by 11.67%, comparing with the same period in 2005.

Cost of goods sold

Cost of goods sold was Baht 4,776.30 million, decreased Baht 662.19 million or 13.86% from the same period last year due to the stability of raw materials price in 2006 which result to an efficiency raw material management. Cost of goods sold has been reduced in greater proportion comparing to total revenue, by which cost of goods sold decreased in amount of Baht 662.19 million whereas total revenue decreased in amount of Baht 574.53 million.

Selling and administrative expenses

Selling and administrative expenses was Baht 84.12 million, increased Baht 4.05 million or 5.06% from the same period last year. The mostly variable costs increasing came from salary, direct labor cost, transportation cost and truck rental.

Gross margin

Company's gross margin in 2006 was 5.04% comparing to 2.62% gross margin in 2005. The company consider to group of products which had a substantial increased gross margin such as billet with sales volume in 2005 of Baht 183.23 million increased to Baht 316.68 million in 2006 and structural steel with sales volume in 2005 of Baht 375.64 million increased to Baht 634.16 million in 2006. Gross margin of the other group of products were also increased in 2006 due to efficiency inventory management while the price of raw material is more stable than year 2005.

Net profit

Net profit in 2006 was Baht 81.62 million, increased by Baht 65.75 million or 414.37% comparing with net profit Baht 15.87 million in 2005 which is corresponded from an efficiency management of raw material and selling the products with higher gross margin.

In 2005 the company has booked Loss on impairment of asset amount of Baht 15.67 million, whereas in 2006 has nil. In 2005 the company has booked Allowance for loss on devalue of inventory amount of Baht 12.04 million. Whereas in 2006 has booked for Baht 0.62 million.

Financial status

Assets

As at December 31, 2006 and 2005, the total asset was Baht 1,707.08 million and Baht 1,511.45 million, respectively. The increase of about 12.94 % came mainly from inventories and pledged deposit to bank.

As of December 31, 2006 and 2005, the amount of the inventory were Baht 472.50 million and Baht 343.11 million, respectively, increasing given that the Company's policy is for increase inventory level for the new distribution centers.

As of December 31, 2006, the amount of the accounts receivable were Baht 619.32 million and collection period is 51 days longer than year 2005 by the result of credit term extension to privilege and reliable customer.

Company credit term policy is usually assign during 30-60 days, the appropriated credit term of each customer was evaluated and closed up monitor by the analyst team, moreover, company also consider in customer risk diversification.

Provision is made of accounts receivable amounts outstanding over 12 months and 100% amount which the management believe may be doubtful.

For non-current assets, Land building and equipment was Baht 177.21 million, increased by Baht 7.84 million. Pledge deposit to bank increased from Baht 149.14 million in 2005 to Baht 207 million in 2006.

Liquidity

According to various of product sizes and types procurement and company policy to maintain minimum 1 month stock of inventory for the purpose of efficiency respond to customer requirement. The company purchase raw material in cash, produce and sell finished product in credit term condition, therefore, the company require huge amount of working capital from both company shareholders' equity and financial institution for inventory management.

At the end of year 2006, the company had cash and cash equivalents about Baht 28.52 million, declining Baht 6.78 million from last year. As a consequence of the company generated cash flows from Operating Activities decreased Baht 440.20 million from the last year. Meanwhile, cash flows used in Investing Activities amounted to Baht 80.32 million, compared with cash flows provided from Investing Activities for Baht 51.35 million in 2005. Part resulted from the company acquired more plant, property,

and equipment. Moreover, cash flows provided from Financing Activities was Baht 348.02 million, due to increased short term loans and overdraft at Baht 350.80 million and dividend payment at Baht 50 million.

Source of Financial Capital

Liabilities

As at December 31, 2006, total liabilities were Baht 965.51 million, the 5.31% decrease was due to return to account payables amount Baht 291.94 million. There was an decrease in other current liabilities amount Baht 108.71 million, whereas increase in short term loans and overdraft amount Baht 350.80 million for raw material procurement plan.

Shareholder's equity

Presently, the issued and fully paid capital of the Company is Baht 500 million, increased from Baht 400 million for 2005. As at the end of 2006, shareholder's equity is Baht 741.57 million, compared to Baht 491.70 million for 2005. This came from the net profit amount Baht 81.62 million for the year 2006 and an increase in its authorized share capital and premium on shares capital amount Baht 118.25 million.

Debt to equity ratio moved from 2.07 times for 2005 to 1.30 times for 2006.

Audit Fees

Thammakarn Accounting Office is an independent auditor whom doesn't have any relationship with the company. The audit fees in 2006 is Baht 350,000 per year and the financial review is Baht 55,000 per quarter.

Main factors and influence which may affect the future operational performance and financial position

1. Volatility of world steel prices is a significant factor effect to domestic steel prices which cause the different performance from making decisions on investment. To deal with this volatility, the company has closely monitored and made the best possible decision approach regarding unpredictable steel prices.
2. The company has invested in distribution centers, this investment result to increase construction expense, selling and administrative expenses and also infrastructure utilized expenses which may cause lower company performance in short term, however the

investment is expected to improve to better market penetration, and improve customer service for local markets in long term.

3. The company released credit term extension policy which set for privilege and reliable customer for the purpose of maintain company sale volume. This policy may sometimes cause the cash flow shortfall, however, the company very careful in cash flow, inventory and also account receivables management.

Industry Situation and Trend

Steel pipe situation in 2006

The consumption quantity in 2006 is minor decelerated compare to the previous year, due to domestic economic situation caused by high level interest rate, inflation, internal political changing. Major projects in construction sector especially property is decelerated, pipe production also reduced and more competitive in pricing.

Steel price changing which effected to the cost of product of pipe is HRC price. Average HRC price in the world market increase from USD458/Ton in 2005 to USD493/Ton in 2006 or 7.55% which the result of steel demand increasing in U.S.A. and Europe.

International Iron and Steel Institute ranked major raw steel producer as follows China, Japan, U.S.A., Russia, South Korea, Germany, India, Ukraine, Italy and Brazil, China has increased steel exporting into world market in 2005 with the capacity above 30% and forecast that supply of steel will be increased in 2007 but depend on world's demand and supply.

Steel Pipe Industry Trend

Trend of steel pipe industry depends on the consumption of steel pipe in relative industries i.e. automobile, construction, furniture, electric appliances and others industries. In 2007 are forecasted that steel pipe industry's growth would be the same trend of world market and domestic steel pipe consumption would be stable or slightly increased. Steel pipe production would be stable which caused by political changing and property investment slow down. But demand of steel pipe for restoration housing and infrastructure, i.e. bridge, road after flood damages in many part of the country, may be increased. However, the government still maintain Mega projects to boost up overall economics. Forecast of Steel pipe export would be decreased due to U.S.A., major importer of steel pipe from Thailand, taken Anti-Dumping measurement to European and Asian country, as well as consumption in EU decrease. The government of China announce to gain export tax of 10% for semi-finished steel products (i.e. slabs) from their exporters which in force from November 1, 2006 and this would be additional cost to the Thai steel manufacturer whose import slab for raw material and produce to HRC.

Financial Statements

For the year ended December 31, 2006

INDEPENDENT AUDITOR'S REPORT

To the shareholders of Rich Asia Steel Public Company Limited.

(Former name "Rich Asia Trading (Thailand) Company Limited.")

I have audited the accompanying balance sheets of Rich Asia Steel Public Company Limited as of December 31, 2006 and 2005, the related statement of income, changes in shareholders' equity and the statement of cash flows for the years then ended. These financial statements are the responsibility of the Company's management. My responsibility is to express an opinion of these financial statements based on my audits.

I conducted my audits in accordance with generally accepted auditing standards. Those standards require that I plan and perform the audit to obtain reasonable assurance about whether the statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statements presentation. I believe that my audit provides a reasonable basis for my opinion.

In my opinion, the financial statements referred to above present fairly, in all material respects the financial position of Rich Asia Steel Public Company Limited as of December 31, 2006 and 2005, the results of its operations, changes in shareholders' equity and cash flows for the years then ended, in conformity with generally accepted accounting principles.

(Mrs. Supreeya Saengudomlert)

Certified Public Accountant No. 811

Bangkok

February 26, 2007.

Rich Asia Steel Public Company Limited
(Former name "Rich Asia Trading (Thailand) Company Limited")

		<u>Dec. 31, 2006</u>	<u>Dec. 31, 2005</u>
1.4	<u>Number of employees</u> (Persons)	122	89
1.5	<u>Personnel expenses</u> (Million Baht)	28.45	20.28

2. Significant accounting policies

2.1 Basis for preparation

The Company financial statements were prepared in accordance with the generally accepted accounting principles as determined in the Accounting Act. B.E. 2543 the Accounting Professions Act. B.E. 2547 and in accordance with the determination of the office of the Securities and Exchange Commission on the subject of preparation and presentation of the financial reports.

2.2 Accounting estimation

Preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates for certain accounting transactions, affecting amounts reported in the financial statements and notes related thereto. Subsequent actual results may differ from these estimates.

2.3 Revenue realization

The Company acknowledges the sales when the products are delivered to the customers.

The Company recognized revenue from rental on period of rental time.

2.4 Cash and cash equivalents

Cash and cash equivalents consist of cash on hand and at financial institutions with an original maturity of 3 months and not subject to restriction.

2.5 Allowance for doubtful accounts

Allowances for doubtful accounts are based on historical collection experience.

2.6 Inventories are valued at cost or net realizable value, whichever is the lower, on the following basis :

Finished goods on FIFO basis.

Raw material FIFO basis.

2.7 Investment in immovable property are stated at the lower of cost or fair value.

2.8 Property plant and equipment – net are stated at cost after accumulated depreciation. The depreciation is computed by using the straight-line method over their estimated useful lives as follows:

Building & Construction	20 years
Improvement office building	5 years
Machinery	5 years
Equipment	5 years
Furniture and Equipment	5 years
Vehicle	5 years

2.9 Financial leased

Equipment leasing contract that all risks and returns are transferred to leasee is a financial lease contract. The contract is recorded as asset amounting to net present value of unpaid amount. Lease payment is split into principal and financial expenses in order to maintain interest rate charged on outstanding principal. Obligation, net of financial expenses is recorded as long-term liabilities, while interest expenses are booked in profit and loss through the lease contract.

2.10 Foreign currency conversion

Accounting in foreign currencies are converted to Thai Baht at transaction date. Assets at the end of the period are converted to Thai Baht at the commercial banks average buying rate. Liabilities in foreign currencies are converted to Thai Baht at the commercial banks average selling rate at the end of the period, according to an announcement of the Bank of Thailand.

Gain (Loss) on foreign exchange rate was already included in the statement of income.

2.11 Basic earnings per share

Basic earnings per share is calculated by dividing net profit by the number of weighted-average shares.

$$\frac{\text{Profit for the year}}{\text{Number of weighted-average shares}} = \frac{81,620,749.33}{435,342,465} = 0.19 \text{ Baht/share}$$

Number of weighted – average shares

$$\text{January 1, 2006 – 24 August 24, 2006} = 400,000,000 \text{ share} \times \frac{236}{365} \text{ days} = 258,630,137 \text{ shares}$$

$$\text{August 25, 2006 – December 31, 2006} = 500,000,000 \text{ share} \times \frac{129}{365} \text{ days} = \underline{176,712,328} \text{ shares}$$

$$\text{Total} = \underline{\underline{435,342,465}} \text{ shares}$$
